

Opportunities for global student exchange

There are many reasons students opt to study overseas during their degree:

- Experience a different culture and gain new life experiences
- Broaden perspectives on life and science
- Try different learning styles and study areas
- Explore the world and make new friends
- Stand out in the graduate job market
- Learn new languages* or improve your language skills

*free language modules <https://www.ncl.ac.uk/sml/study-with-us/university-wide-language-programme/>

What options are available?

- **Semester abroad:** study abroad in Semester 1 or 2* of your 2nd year (NUMed, Newcastle University Malaysia). *Biomedical Sciences degree only in Sem 2
- **Summer placement abroad:** take a summer research placement overseas between your 2nd and 3rd years
- **Year abroad:** study for an entire year abroad between 2nd and 3rd year
- **Stage 3 project abroad:** conduct your final year research project overseas

Where can I go?*

International partner institutions:

Monash University, Australia

 University of Illinois, USA
 University of Pittsburgh, USA
 University of Vermont, USA
 University of Waterloo, Canada

*note lists update each year

European partner institutions:

University of Tübingen, Germany
 University of Münster, Germany
 Technical University of Munich, Germany
 Paul Sabatier University, Toulouse, France
 Sorbonne University, Paris, France
 Lund University, Sweden
 Leiden University, Netherlands
 Pompeu Fabra University, Barcelona, Spain

FAQs

When do I apply? Applications open in November and close in early January (for mobility the following academic year).

Can I do more than one exchange? As there are limited places available, multiple exchanges are not possible, however it can be possible to do a semester each in two different locations, or other informal overseas options.

Is it expensive? Realistically it can be expensive due to costs of flights, visas, accommodation and general travel, however applicants may be entitled to funding:
